General information

General comments by the IO

- Championship program
 - Any deviations from the Prg on the website?
 - Version updated 26 June on web
 - Opening ceremony : details later in briefing
 - Storstua, Koppang, start at 18:00
- Risks and safety precautions
 - Speed on the roads -> Mooses, reindeers. You can meet vipers, ticks, mosquito
- Fauna and flora; how to react
 - USE tippet collectors, respect the environment, Show respect for Farmland and Grazing Animals and Agricultural Areas
 - Smokers must have system for collecting ashes and butts
 - Be Aware of fire (the nature has been dry for long time)
- Medical
 - 113 (acute) and not emergency 116 117
- General emergency number
 - Ambulance 113, Fire Dep. 110 and Police 112
- Location of bulletin board
 - Results online only via championship website (see next slide) : https://fips-mouche.cips-fips.com/ladies-results/?_champ_id=9084
 - Communications thru whatsapp groupe "captains"

Draw : how does it work !

THE COMPETITOR DRAWING ALGORITHM: ENSURING FAIRNESS THROUGH MATHEMATICAL LOGIC

SYSTEM REQUIREMENTS & SAFEGUARDS

THE 'BLACK BOX' PRINCIPLE

To prevent interference, the algorithm operates independently of the user, providing a final result with no possibility of manual adjustment during the process.

BLIND DRAW METHODOLOGY

The system has no information about specific competitors; it only recognizes team affiliations to ensure unbiased distribution.

RANDOMIZED SELECTION

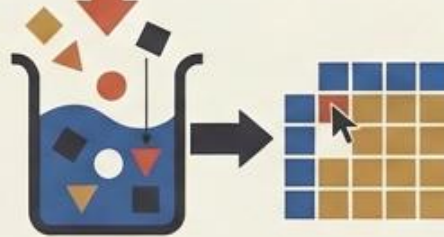

The algorithm utilizes a mathematical "random drawing without replacement" method to maximize the entropy of the results.

THE DRAWING PROCESS FLOW

STEP 1: DEFINE BOUNDARY CONDITIONS

STEP 2: POOL INITIALIZATION & DRAWING

STEP 3: CONDITION VALIDATION LOOP

Conditions Met

Conditions
Not Met
(Redraw)

STEP 4: DEADLOCK HANDLING

If no mathematical solution is possible for the current path, the algorithm restarts the entire draw from scratch.

OUTCOMES & VERIFICATION

3,000

3,000 ITERATION THRESHOLD

The algorithm is permitted to restart the entire drawing process up to 3,000 times to find a valid mathematical solution before timing out.

RESOLUTION PHASE

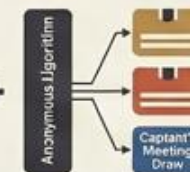

If a solution is found, the matrix is presented.

If the conditions are mathematically impossible, the user is prompted to modify the boundary conditions.

FINAL INTEGRITY CHECK

To prevent tampering, the final competitor names are only combined with the algorithm's letters (A-R) after an independent captain's meeting draw.

Draw for “WLFFC 2026”

- Proces
- Each captain will come forward to make the physical draw for his/ her team
 - Step 1 : verify that names are correct
 - Step 2 : identify reserve (if any)
 - Step 3 : draw of the team number
 - Step 4 : draw group for each team member
- At end of draw the groups table will be made available
